

Decision-making in PCI

Thursday 17th December 2015

HEARTBEAT EDUCATION CENTRE

University Hospital Southampton
NHS Foundation Trust

Have you ever wondered how interventional cardiologists can have so many different opinions about how cases should be managed when we all use the same **evidence base**? If so...

12:45 LUNCH

13:45 STEMI: Who? How late? How many vessels? Role of FFR? LM?

14:45 NSTEMI: How much? Grafts? LM? Role of FFR?

15:30 COMPLICATIONS: the nightmare... the solution?

16:30 Summary and Request for feedback

A course designed for SpRs and consultants specialising in coronary intervention.

The course aims to address the practice of PCI with focus on the decisions that it presents to us and how to approach them in both an evidence based and common sense manner. It will be based upon a series of carefully selected real life cases that will lead to discussion about options both based upon experience and with reference to the published evidence using data briefly summarised at each discussion point, rather than in long formal talks.
